

# 5000mAh POWER BANK

Integrated Lightning™  
& Micro-USB Cable

## OPERATOR'S MANUAL

Model #: ZKPBK1055

### Contents

5000mAh Power Bank  
Operator's Manual

Please read in its entirety prior to use

## Charging the Power Bank:

- 1) The Power Bank can be charged by plugging the integrated USB-A cable into an USB charger that plugs into an AC outlet, DC car power port, or powered USB port.
- 2) The Power Bank's blue LEDs will illuminate in sequence and blink while charging. Upon completion, the LEDs will remain illuminated signaling a complete charge.

**Note:** The approximate charging time for the Power Bank is 2-4 hours from an AC outlet and up to 6 hours from a computer or other power source.

**WARNING:** Safe operating temperature range is 32°F - 100°F. DO NOT EXCEED THE RECOMMENDED SAFE OPERATING TEMPERATURES. Charging in environmental temperatures greater than 100°F may degrade performance; reduce the life of the battery; cause the product to overheat or fail and may result in a risk of fire, explosion and potential bodily injury or property damage.

## Charging Your Device:

1. Fully charge the Power Bank before use.
2. Connect the Lightning™ cable to the Lightning™ port of your mobile device and charging will begin immediately.
3. Connect the Micro-USB cable to the Micro-USB port of your mobile device and the charging will begin immediately.
4. The blue LEDs will blink to indicate charging and to display the remaining battery life.
5. Use care when extending the charging cables to avoid damage or breakage. The cable should be slack while connected to your device. Never allow your device to hang from the charging cables.
6. Do not force the cable connectors when plugging into a device – they should connect easily with minimal effort. Forcing connectors may cause damage to the Power Bank or your mobile device and may invalidate your Limited Liability Warranty.
7. For best results, be sure to recharge your Power Bank after charging your devices.

Failure to use the Power Bank provided equipment properly may cause the product to fail or overheat, in certain circumstances, resulting in a risk of fire, explosion and potential bodily injury or property damage.

## USB Ports:

1. **Note:** This Power Bank features a USB port and integrated Micro-USB & Lightning™ charging cable with a maximum shared output of 5V/2.4A.
2. Before charging your electronic device, please refer to the manufacturer's documentation for charging requirements and cable for your device.
3. Insert a USB charging cable (not included) into your device and into a USB-A port on the Power Bank and charging will begin immediately. The blue LEDs will blink to indicate charging and to display the remaining battery life.
4. Do not force the cable connectors when plugging into the Power Bank – they should connect easily with minimal effort. Forcing the connectors may cause damage to the Power Bank and may invalidate the Limited Lifetime Warranty.

## Warning:

The Power Bank contains a Lithium Polymer Battery. The following precautions should be taken to ensure proper and safe operation:

- The battery, which is contained in a hermetically sealed container, should never be opened, destroyed or incinerated.
- Avoid operating the Power Bank in high humidity or immersion of the Power Bank or battery in liquids including water or salt water.

- Avoid operating or storing the Power Bank in direct sunlight or high temperatures near or around other heat sources.
- Do not operate the Power Bank if it is wet or damaged to prevent electric shock, explosion and/or injury. Do not attempt to open, modify or misuse in any manner.
- Do not over-charge the battery.
- Battery may explode or cause burns if disassembled, crushed or exposed to fire or high temperatures, which may result in bodily injury or property damage.

Always follow provided instructions regarding charging and USB connections. Failure to do so may cause damage to the Power Bank, your mobile device and, may invalidate the Limited Lifetime Warranty.

- The Power Bank produces heat while charging. Always operate in well-ventilated areas.
- Keep the Power Bank ports free from dust or debris that may prevent proper connections.
- Do not use the Power Bank or its integrated cables for anything other than charging electronic devices.
- Keep the Power Bank ports free from dust or debris that may prevent proper connections.
- Do not use the Power Bank or its integrated cables for anything other than charging electronic devices.
- Do not charge the Power Bank and an electronic device at the same time. This will shorten the life of the battery.

**Warning:** Lithium Polymer batteries can rupture, ignite, or explode when exposed to temperatures over 100°F or when stored in direct sunlight. Do not operate while covered or poorly ventilated. Do not store in a motor vehicle at high temperatures.

- Attempting to short-circuit or alter the battery polarity can also cause the battery to ignite or explode.

**⚠ WARNING:** This product can expose you to chemicals, including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)

## Specifications:

- Battery Type: Lithium-Ion Polymer
- Capacity: 5000mAh
- AC Input: 100-240VAC 0.15A 50/60Hz
- DC Cable Input: 5V/2A
- Lightning™ Cable Output: 5V/2.4A
- Micro-USB Cable Output: 5V/2.1A
- USB-A Port(s): 5V/2.4A
- Total Output: 5V/2.4A MAX

ZipKord provides a Limited Lifetime Warranty on the Power Bank.
