

Wireless Desktop Charger

User Manual

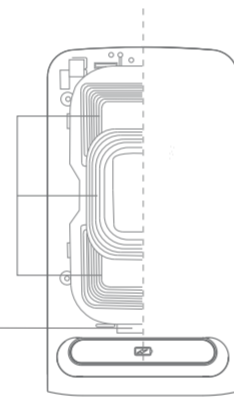

User Manual

Thanks for choosing the ZipKord Wireless Desktop Charger! Our Wireless Desktop Charger is a stylish and convenient charging solution for phones compatible with inductive (wireless) charging technology.

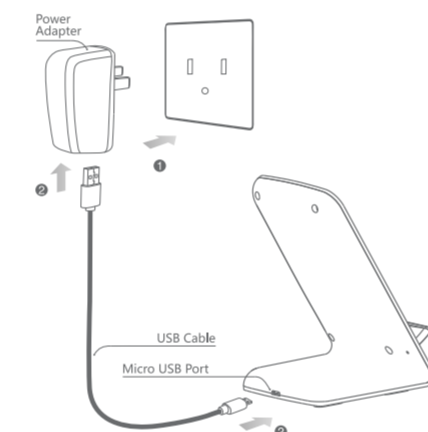

Please review this manual for operating instructions and technical information.

Three coil design to ensure the largest charging area

LED shows standby and charging status

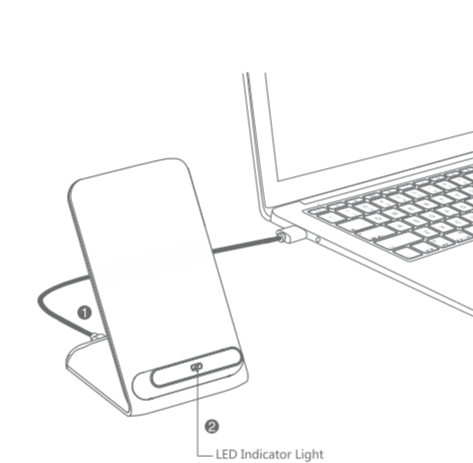

Connect to Power Adapter

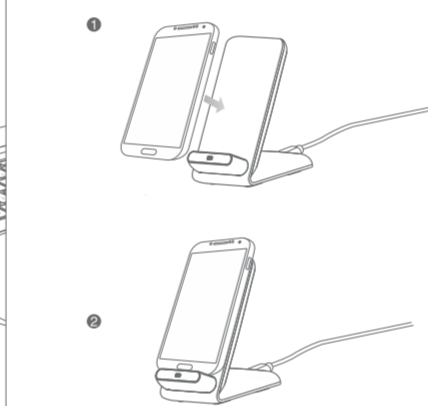

- 1 Connect an AC wall charger (not included) to a power outlet.
 - 2 Connect a Micro USB charging cable to the wall charger and the Desktop Charger.
- The LED indicator will turn green to indicate standby.

Connect to a PC for Charging

- 1 Connect a Micro USB charging cable to a USB Port and the Desktop Charger.
- 2 The LED indicator will turn green to indicate standby.

Charging Mode

- 1 Confirm the charging stand is in standby (Green LED is lit).
- 2 Place your phone on the stand vertically or horizontally and the LED will change from Green to Blue and begin charging your wireless charging compatible phone.

If the LED does not change from Green to Blue and flashes Instead, this indicates improper placement. Adjust the phone position until the LED turns Blue.

Specification

Input:	5V / 2A	Output :	5V / 1A Max
Charging Distance:	4-10mm		
Frequency:	110-205Khz	Conversion:	≥ 72%
Dimensions:	115x70x90mm	Weight:	185g
